

PetPluse

FULL-STACK PLATFORM

LOCATION-BASED PET CARE ECOSYSTEM · AGENTIC AI

One platform for every pet care need.

Connecting pet owners with verified vets, trainers, and pet shops — powered by a real agentic AI copilot, database-safe booking, and full bilingual (Arabic/English) support.

VetAI Copilot

Agentic AI that books real appointments & triages emergencies — bilingual EN/AR, open-weight models, no paid GPT API.

Geo Booking

Haversine nearest-first vet & trainer discovery, with a database-level lock that makes double-booking structurally impossible.

B2B2C Marketplace

Verified vendor storefronts, bulk CSV catalogue import, and a secure Paymob checkout pipeline.

Clinic Wallet & Trainer Programs

Prepaid clinic credit and capacity-safe group classes with automatic waitlisting — concurrency-tested against the live database.

Real-Time Chat

Socket.IO messaging with invite-and-accept spam protection per user.

Lost & Found Hub

Geo-radius matching between found and lost reports, with automatic owner notification — not a manual board.
